**SLIP-STOP GUARD *and*
SLIP-STOP GUARD Jr.**

Clear Edging Enhancement Tape
(For Use With Wax Systems)

DESCRIPTION: **Slip-Stop Guards** are a round clear edging enhancement tape designed to protect the back side of all lenses from the edger chuck and improve chuck friction. It removes cleanly after use, leaving no residue. Slip-Stop Guards reduce lens slippage and prevents lens scratching in the edging process.

Slip-Stop Guards are a factory die cut edging enhancement tape supplied with their own dispensing carton, providing economy, efficiency and improved quality to the edging process.

APPLICATIONS: **Slip-Stop Guards** are placed on the back side of all lenses before edging. Remove edging enhancement tape after completion of the edging process. Lenses are ready for additional backside coatings or mountings.
